Chairman's speech

Dear shareholders,

Fiscal 2014-15 turned out to be a tough year for the Company in which we fought very hard to maintain our growth against the challenges unleashed in the wake of an adverse economic environment that threatened to derail our projections.

The slowdown in the consumption appetite of the downstream sectors affected offtake, realisations and terms of trade for the ferro alloys industry. Shyam Century Ferrous Limited also bore the brunt of such an adverse scenario. However, we successfully grew our revenues to ₹115.91 crore in 2014-15. This contrarian performance came about on the back of robust complement of sustainable eco-friendly technologies, best-in-class equipment sourcing, prudent O&M practices, higher plant efficiencies and an uncompromising emphasis on quality.

Business review

Up to March 31, 2014, the ferro alloys business was conducted by Star Ferro and Cement Limited. Following the demerger of the ferro alloys division of SFCL, the ferro alloys business is being conducted by the Company. The ferro alloys business mainly comprises of manufacturing of ferro alloys in Meghalaya and power generation via a captive power plant.

The Company manufactured 14,835 metric tonnes of ferro alloys in 2014-15. The Company is an ISO 9001:2008-certified organisation and believes in complying with strict quality norms. Our product range includes: ferro silicon and silico manganese and our primary market is India where we sell 100% of our production.

We endeavour to manufacture high-quality products and deliver them within the stipulated time to our clients. Quality raw material, cutting-edge equipment and stringent quality control measures ensure the manufacture of qualitatively consistent products.

Our product range includes the highest quality ferro alloys, a key input for steel industries, in line with the norms laid down by the Bureau of Indian Standards.

With multiple furnaces of sizeable capacities, the Company has the flexibility to produce different types of ferro alloys as per market dynamics. This adds to the competitive advantage of the organisation as different product mixes can be maintained at the same time even while manufacturing low quantities. As a designated consumer under the PAT cycle, we also achieved the target set for us by BEE.

Initiatives that translated into industry outperformance

The Company recognises that when customers turn hesitant the best thing is to strengthen the value of intangible offerings - product customisation and timely delivery. So even in a weak market, we were able to liquidate our inventories, which made it possible to report savings in terms of working capital management and interest costs. Thus, we

were able to extend one-off transactions into enduring customer engagements, which in turn enhanced revenue visibility.

Easy availability of raw materials and fuel: The Company sources its lam coke, coal, mill scale, quartz and charcoal from different suppliers located in Meghalaya and nearby places. The Company is one of a handful of ferro alloys manufacturing companies in the country with a captive power plant. This is a major competitive advantage since power availability in the region is very uncertain and the price is also exorbitant. The products of the Company enjoy consistent demand in India and qualitatively are at par with those manufactured by international players. Furthermore, power is also procured through the IEX platform at times to capitalise on cost advantages.

Quality assurance: Quality assurance at every stage is integrated into all our processes. We have a system of in-built checks and balances to ensure effective quality control. The Company has a well-equipped quality control division with the latest equipment which ensures qualitative uniformity of incoming raw material,

output and finished products. Qualified and experienced chemists ensure that the desired quality standards are adhered to. This results in:

- Better** process control
- Enhanced** metal recovery
- Optimised** reductant consumption
- Minimised** flux consumption
- Efficient** reuse of solid waste
- Improved** furnace efficiency
- Constant** improvement in output quality and customisation as per customer specifications

Outlook

Macroeconomic optimism: Despite significant improvements in the macroeconomic environment, a demand slump in China and sharp currency depreciations in many of the trading nations has led to a significant increase in imports into India and made exports less competitive in the global markets, thereby adversely impacting many of the power-intensive sectors. India Inc. has also been impacted by the high levels of indebtedness. Lending constraints faced by banks due to weak balance sheets and exposure limits have delayed the revival in the investment climate.

14,835

metric tonnes ferro alloys manufactured by the Company in FY15.

However, with the Central Government's thrust on the infrastructure sector, the prospects of steel and its allied industries have brightened. Favourable monsoons may ease the skew in the balance of payment scenario.

Nevertheless, India is one of the few countries where the growth is expected to improve despite the global outlook taking a turn for the worse. As per CSO's advanced estimates, Indian economic growth for FY 2014-15 is projected at 7.4% as compared to 5.1% in FY 2012-13 and 6.9% for FY 2013-14. The investment climate is expected to receive a further fillip from a higher governmental spend towards infrastructure, increase in foreign direct investment in the capital-intensive sectors, the Central Government's continued thrust on reforms and reduction in key policy rates. Our blueprint

The ferro alloys industry mainly caters to the needs of the steel industry. Ferro alloys are used as additives and reducing agents in steel manufacture. The Indian ferro alloys industry has a capacity of 5.15 million tonnes. It accounts for nearly 10% of the global production and is among the ten-largest producers in the world.

In the midst of raw material availability being a key factor for ferro alloys industry growth, production is concentrated in a few pockets. India, South Africa, China and the CIS countries represent a large source of ferro alloys. Bulk of the Indian supply constitutes ferro chrome (about 32%), ferro manganese and silicon manganese (about 62%) and others (6%). At present, though there is a surplus capacity in the country, severe power cuts have been hampering production.

Ferro alloys producers across the globe in the last couple of years were one of the worst hit in history following a drastic collapse in demand and vertical fall in prices of finished products. After a couple of difficult years, well-coordinated efforts at the global level and various stimulus packages (legislative, fiscal and monetary) have helped to put the world economy back on track. Strong growth in steel and stainless steel segments is expected in the near future with strong demand emanating from the infrastructure industry.

Subsequently, it is expected that the excess capacity will be absorbed and the ferro alloys industry will bounce back in the years to come.

Keeping in mind the potential growth in the housing and infrastructure verticals, the overall demand for ferro alloys is expected to remain buoyant.

India Inc. has enough reasons to be excited with a dynamic, pro-business government at the helm. This is also the first instance of a single political party winning a decisive majority in the past 32 years. This dominant majority augurs well for the country by ushering in reforms acceleration and national prosperity. The Central Government has indicated that a keen emphasis is going to be laid on infrastructure creation in North Eastern India. This would result in robust economic growth over the medium-term and translate into enhanced business opportunities for the industry at large.

Message to shareholders

We are standing at a critical juncture in our Company's existence. As the Central Government intensifies its efforts towards ushering in infrastructural development in India, our production capacities and immaculate quality standards perfectly positions us to make the most out of the emerging opportunities and enhance shareholder value over the years to come.

Warm regards,
Sajjan Bhajanka, *Chairman*

Ferro Alloys Business

The year 2014-15 was a difficult one in terms of operating business environment with Indian economy facing various challenges. Persistent inflationary conditions together with poor market sentiments and high interest rates pegged industrial growth. Infrastructural bottlenecks, weak rupee coupled with a tapered demand and contraction of industrial production was observed during the year under review. Liquidity conditions have worsened due to persistent hardening of interest rates, resulting into drying of availability of funds for the Industry.

The Steel sector, one of the largest consumers of your

Company's products, witnessed weak demand and dumping of Ferro Silicon from China into India. As a result, the demand for Ferro Alloys remained subdued.

Despite these constraints and challenging environment, your Company continued to focus on its fundamental strength of its ability to continuously focus on productivity and quality. There was strong emphasis on internal efficiencies together with an improvement in the sales mix which enabled your Company to withstand inflationary pressures on costs and profitability.

During the year under review, your Company has sold 13,849 MT of Ferro Silicon during the year under review as against 17,331 MT during the immediate previous year. While your Company constantly strives to increase stakeholder's value, emphasis continues to be on delivering value to customers and strengthening processes while driving sustainable practices, resulting into expanding our customer base.

Future Outlook

The Indian Ferro Alloys industry has a capacity of 5.15 million tonnes and accounts for 10% of the world's Ferro Alloys production. The industry has abundant rich Chrome Ore and Manganese deposit but has not been globally competitive despite low manpower cost mainly due to the various challenges faced by the Industry essentially on account of high cost of electric power and power shortage, inadequate transportation facilities for rapid transportation of ores from mines to plants, lack of capital and technology.

There is stiff competition from the producers and exporters of the Ferro Alloys in India. Exports from India to China, South Africa and other countries constitute nearly 50% of the market of the Ferro Alloys. China has become the largest consumer of

Ferro Alloys and thus has been dominant in the market. There is a wide fluctuation in Ferro Alloys price in international market. The Global Ferro Alloys market is anticipated to increase at a CAGR of 5.4% by the FY2020.

With the change in the Government, the Indian industry is expected to grow at the rate of 8-10% over the medium term and translate into enhanced business opportunities for the overall industry.

India is expected to be one of the highest in growth of Steel consuming nations in the next decade.

With this, Steel scenario globally and domestically is likely to be changed, the consumption of Ferro Alloys will increase domestically and internationally in coming years.

Opportunities and Threat

Ferro Alloys business has been transferred to the Company pursuant to the Scheme of arrangement. Performance of the Company depends on the continued demand for our products in the steel and stainless steel industry. The Steel business is cyclical in nature, accordingly, performance and results of operations are influenced by a variety of factors relating to the steel industry like fluctuations in demand and supply of steel and steel products, both domestically and internationally, general economic conditions and changes in the international prices of steel and steel products and slowdowns in steel industry. Uncertainty of availability of raw materials and other resources such as water, uninterrupted power supply, skilled manpower etc., high cost, insufficient infrastructural facilities for rapid transportation from ore mines to plants may also affect the operations and in turn the financial condition and profitability of the Company.

The Indian Ferro Alloys industry has tremendous growth opportunities which may lead India in emerging as the leading exporter of Ferro Alloys for the world.

In view of investment projections by the Government for infrastructural sector, demand of steel in future may accelerate. The Twelfth Five Year Plan projects infrastructural investment worth US\$ 1 trillion, which could accelerate steel off-take. The increase in infrastructural spending could translate into an additional steel demand.

Performance and Operations Review

Due to slower growth in Global steel market output, the performance of Ferro Alloys remained dampened and subdued during the year under review. Despite weak economy and intense market situation, the Ferro Alloys segment posted a turnover of ₹11,591 lacs and profit before tax stood at ₹881.30 Lacs. During the year under review the production was at 14,835 MT.

Notes to Financial Statements

1 CORPORATE INFORMATION

Shyam Century Ferrous Limited (the Company) is a public company domiciled in India and incorporated on 12.04.2011 under the provisions of the Companies Act, 1956. Pursuant to the Scheme of Arrangement between Star Ferro and Cement Limited (SFCL), the Company and their respective shareholders as approved by the Hon'ble High Court of Meghalaya at Shillong vide its order dated 31st March, 2015, all the assets and liabilities of the Ferro Alloys division (i.e. business and interest of SFCL in manufacture of Ferro Alloys including captive power plant at Byrnihat) have been transferred to and vested in the Company at their respective book values on a going concern basis with effect from 1st April, 2014 being the appointed date. The Company is engaged in manufacturing of Ferro Alloys and generation of Power. The manufacturing unit is located at Byrnihat, Meghalaya. The company is selling its product across India.

1.1 Basis of Preparation

The financial statements of the company have been prepared in accordance with generally accepted accounting principles in India (Indian GAAP). The Company has prepared these financial statements to comply in all material respects with the Accounting Standards as prescribed under section 133 of the Companies Act, 2013 read with Rule 7 of the Companies (Accounts) Rules, 2014 and the relevant provisions of the Companies Act, 2013, to the extent notified. The financial statements are prepared under the historical cost convention on accrual basis and on the basis of going concern. The accounting policies are consistently followed by the company and changes in accounting policy are separately disclosed.

1.2 Summary of Significant Accounting Policies

(i) Use of Estimates

The preparation of financial statements in conformity with Indian GAAP requires the management to make judgments, estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities and the disclosure of contingent liabilities, at the end of the reporting period. Although these estimates are based on the management's best knowledge of current events and actions, actual results could differ from these estimates.

(ii) Revenue Recognition

Revenue is recognised to the extent that it is probable that the economic benefits will flow to the company and the revenue can be reliably measured.

(a) Revenue from sale of goods and services rendered is recognised upon passage of title which generally coincides with delivery of materials and rendering of services to the customers. The Company collects central sales taxes and value added taxes (VAT) on behalf of the government and, therefore, these are not economic benefits flowing to the Company, hence excluded from revenues. Sales include excise duty and are net of rebates, trade discounts and returns.

(b) Dividend Income is recognised when the shareholders' right to receive the payment is established.

(c) Interest income is recognised on a time proportion basis taking into account the amount outstanding and rate applicable.

(iii) Fixed Assets

Fixed Assets are stated at cost or revalued amount, as the case may be, less accumulated depreciation / amortisation and impairment, if any, except freehold land which is carried at cost. An impairment loss is recognised wherever the carrying amount of an asset exceeds its recoverable amount which represents the greater of the net selling price and 'Value in use' of the assets. In assessing the value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and risks specific to the asset.

(vii) Depreciation

Depreciation on fixed assets is provided under Written Down Value method in accordance with the provisions of Schedule II to the Companies Act, 2013 and considering the useful lives for computing depreciation specified in Part 'C', thereof. In respect of an asset for which impairment loss is recognised, depreciation is provided on the revised carrying amount of the assets over its remaining useful life.

(viii) Investments

Investments that are readily realisable and intended to be held for not more than a year are classified as Current investments. All other investments are classified as long-term investments. Cost of Inventories is computed on FIFO basis.

Net realisable value is the estimated selling price in the ordinary course of business, less estimated costs of completion and estimated costs necessary to make the sale.

In the year in which the Minimum Alternative Tax (MAT) credit becomes eligible to be recognised as an asset in accordance with the recommendation contained in guidance note issued by the Institute of Chartered Accountants of India, the said assets is created by way of a credit to the statement of profit and loss and shown as MAT credit entitlement.
